

## December 2009

**1. True (A) or false (B) – click on the correct answer:**

Graduate entry students and matric entry students are equally efficient at using self-directed learning time in problem-based learning programmes.

**2. True (A) or false (B) – click on the correct answer:**

The SOLO taxonomy is a useful way of describing the depth of knowledge required when defining learning outcomes in a curriculum.

**3. True (A) or false (B) – click on the correct answer:**

Basic life support skills knowledge can be adequately assessed using a simple 9-question survey.

**4. True (A) or false (B) – click on the correct answer:**

Programme logic models can be used to design and develop courses or programmes.

**5. True (A) or false (B) – click on the correct answer:**

Service learning has not been shown to assist in educating communities about basic health issues.

**6. True (A) or false (B) – click on the correct answer:**

Contrary to expectations, community-based learning experiences do not help students become familiar with the reality of health care resource constraints in South Africa.

**7. True (A) or false (B) – click on the correct answer:**

Electronic on-line learning activities are a good way to learn teamwork.

**8. True (A) or false (B) – click on the correct answer:**

Tutor assessment during problem-based learning sessions correlate well with student performance in summative examinations.

**9. True (A) or false (B) – click on the correct answer:**

Electronic portfolios do not promote reflection in clinical practice.

**10. True (A) or false (B) – click on the correct answer:**

Multimedia lectures can be used to explain complex concepts in small chronological steps.

**11. True (A) or false (B) – click on the correct answer:**

Moodle is a free electronic database facility that can be used to develop online portfolio activities.

**12. True (A) or false (B) – click on the correct answer:**

Simulation is a useful way to teach clinical procedural skills.

**13. True (A) or false (B) – click on the correct answer:**

Mind maps may be used to promote integration across disciplines in teaching programmes.

**14. True (A) or false (B) – click on the correct answer:**

All health care professionals must attend a course in clinical trials practice before engaging in clinical trials research.

**15. True (A) or false (B) – click on the correct answer:**

Medical students are keen to have formal teaching in communication and counselling skills.

**16. True (A) or false (B) – click on the correct answer:**

An electronic patient record registry is an easy way of keeping track of clinical skills exposure in workplace-based learning setting.

**17. True (A) or false (B) – click on the correct answer:**

Good patient communication skills have not been shown to improve patient compliance with treatment plans.

**18. True (A) or false (B) – click on the correct answer:**

Blackboard-based teaching is popular because it provides more time for students to think about and understand the material being presented.

**19. True (A) or false (B) – click on the correct answer:**

Mind maps can be used to develop a problem-solving approach to clinical teaching.

**20. True (A) or false (B) – click on the correct answer:**

Electronic case registries can also be used to characterise the nature and extent of clinical exposure in training programmes.

CPD questionnaires must be completed online via [www.cpdjournals.org.za](http://www.cpdjournals.org.za).

After submission you can check the answers and print your certificate.

Questions may be answered up to 6 months after publication of each issue.

Accreditation number: MDB001/012/07/2009 (Clinical)
